/ Canada's first Faculty of Medicine, established in 1829

/ The Faculty of Medicine comprises 13,000 academics, staff, students, residents and fellows

Discover what McGill has to offer

**A brilliant, international student body. A global alumni community.
A place in a multilingual city and a university committed to diversity.**

These are McGill's greatest strengths that set it apart. As McGill enters its third century, it will build on its history, experience and reputation as a centre of academic excellence. Reaching across borders, we will partner with other leaders – locally and internationally – and together we will train health professionals who thrive in their fields, and who will make a positive impact on the communities they serve.

The McGill Faculty of Medicine, the first in Canada, began with a core belief – that knowledge and compassion can lead to solutions that eradicate disease. Some 200 years later, our belief remains the same, while so much around us has changed.

Today, our alumni include Nobel Prize winners, health care leaders, astronauts, pioneers in oncology, stem cells, palliative care, infection and immunology, primary care, artificial intelligence, computational medicine, genomics and neuroscience.

Multilingual and culturally diverse, the Faculty offers an education that prepares future health professionals who are ready and determined to find answers to the toughest questions. To create new, transformative knowledge. To break new ground. To overcome the most challenging health problems and make the world healthier.

There are over 275,000 McGill alumni based in more than 180 countries. Our illustrious graduates include:

- / **3** Prime Ministers
- / **5** Astronauts (more than any university in Canada)
- / **9** Nobel Prize Winners
- / **145** Rhodes Scholars

“I moved to Montreal from Kuwait five years ago to do my residency training. I have really found a home within my McGill community. I’ve learned a lot from my mentors and have made lifelong friends among my fellow residents. I have truly enjoyed my time here. Yes, even winter.”

Nourah Alyouha, MD, MSc
From Kuwait
Resident - Year 5
Otolaryngology-Head and Neck Surgery

Outstanding learning opportunities

We pride ourselves on providing our students, residents and fellows with excellent support and personalized learning to help them develop their skills and knowledge. But, be prepared to be challenged. McGill's high standards ensure your training will be exacting, energizing and tremendously rewarding.

You will be paired with our internationally renowned faculty who are based at McGill's affiliated teaching hospitals, community clinics and institutes. They will mentor you and will ensure you receive the most intellectually and scientifically stimulating of educations whether on the hospital floor, in the operating room, in the emergency room or in any other clinical environment.

Our graduates go on to become leaders in their field.

Undergraduate Medical Education (UGME)

- / International students in their final year of medical school can apply for Electives*

Postgraduate Medical Education

- / Over 70 Residency Programs
- / **NEW: Postgraduate Visiting Electives for International Trainees**
- / 240 Fellowship Programs
- / Two Areas of Focused Competence Programs

Join the McGill medical community - we're happy to have you on our team.

Training session at our world-class Steinberg Centre for Simulation and Interactive Learning where physicians and other health professionals benefit from hands-on practice in difficult and potentially dangerous procedures without risk to patients.

“There are a number of reasons why I am enjoying my residency at McGill. One of the most important, the city is **safe**. Whether walking around town or working in the hospital, I always feel safe. Also, the city is culturally diverse and most people are very friendly. I also love the four seasons. With a good-quality winter jacket and boots, winter is fun. Finally, McGill’s affiliated teaching hospitals offer a variety of different research and clinical experiences. I’ve treated a wide range of patients, have benefitted from simulation training and receive a lot of academic support.”

Montreal General Hospital of the MUHC

Major urban teaching hospitals and community clinics

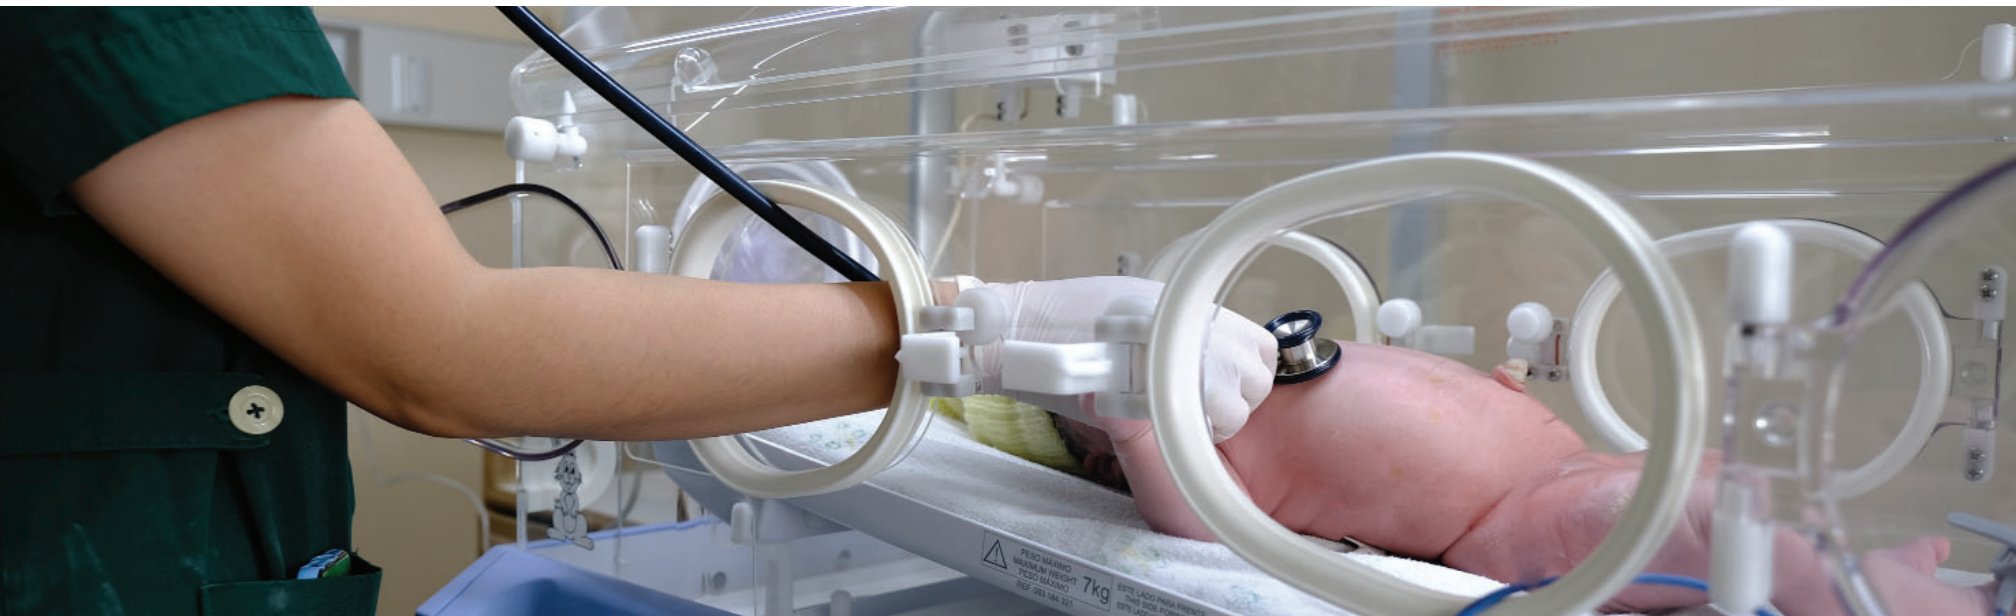

From primary to tertiary and quaternary care, you will be exposed to all facets of medicine

McGill's affiliated teaching hospitals, community clinics and institutes serve Montreal's large, culturally diverse population. Our dedicated physicians and health professionals ensure academic excellence in the clinical environment so you are well prepared to address the present and future health needs of the populations you will serve.

Upon graduation, you will be technically competent, adept at solving problems, capable of functioning as a member of a

multi-disciplinary team and committed to lifelong learning. You'll learn to be compassionate and to respect the highest ethical standards in your relationships with patients. As well, you'll exercise persistent curiosity towards the mechanisms of health and disease.

Our graduates are leaders in their fields, whose footprint can be seen around the globe – a testament to the exceptional standards to which we are committed.

Bienvenue à Montréal

/ Immerse yourself in a new culture

McGill's Faculty of Medicine is nestled in the heart of Montreal, one of the most vibrant and multicultural cities in the world.

/ Montreal – one of the best student cities in the world

Montreal is North America's top city for students and the 6th best student city in the world.* The city earned strong marks for its large and diverse student population. And Montreal is affordable. The cost of renting an apartment or even buying a top-flight condo in the city core is comparatively inexpensive. Plus, the city is the safest among 10 of the largest metropolitan areas in Canada and the U.S.** * QS Quacquarelli Symonds / ** Statistics Canada - 2018

/ Learn French – C'est facile

Throughout your day, you'll hear Montrealers switch from French to English and back as they commute across centuries-old cobblestones, ride the Métro, or swoop past on a Bixi bike. As well, in our clinical settings, the health care team will readily converse in both languages. There are plenty of opportunities to learn French, including courses and workshops offered by McGill and throughout the city.

/ Montreal – a foodie's paradise

You have to try Montreal classics like poutine, smoked meat, bagels, tarte au sucre, crêpes, oh, and don't forget the maple syrup. But beyond these iconic Montreal foods, the city is home to thriving Greek, Italian, Middle Eastern, African and many other communities— ensuring an incredibly diverse restaurant scene. You'll find everything from kibbeh and kabsah to jianbing (savory Chinese panckes) to Italian arancino and British fish and chips.

/ Savour new experiences, foods and activities – like hockey: Go Habs Go! And yes, you'll even learn to love winter (eventually).

McGill: The gateway to your fulfilling medical career
